

Wood County  
WISCONSIN

LAND CONSERVATION  
DEPARTMENT

---

November 21, 2018

To whom it may concern:

This letter is to inform you that Coulee Frac Sand LLC has applied for a Nonmetallic Mining Reclamation Permit. The Wood County Land and Water Conservation Department administers the Nonmetallic Mining Reclamation Ordinance that Wood County adopted in January of 2001. It states in the ordinance that anyone owning property within 300 feet of the property boundaries of the mining site must be notified of the application. Please consider this your notification. Please read the accompanying public notice for a brief description of the application and if you have any questions feel free to give me a call at the Land Conservation Department. I can be reached at (715) 421-8547. If you wish to view the supporting documentation an appointment must be set up prior.

Sincerely,

Tracy Arnold  
Conservation Program Coordinator
